A world leader in intralogistics –

thanks to comprehensive expertise and innovative solutions.

Global trade requires perfectly orchestrated logistics processes to create a seamless goods flow that profits everyone involved. The importance of fully automated warehouse systems and the need for more complex intralogistics is therefore increasing continuously.

This is what we stand for:

SSI SCHAEFER has for decades been in demand as a partner worldwide with the greatest level of expertise and wide-ranging sector-specific experience when it comes to planning and implementing integrated logistics systems.

A comprehensive product range and the widest range of services in the field of intralogistics, customers can access highly efficient solutions all from one source. Renowned companies from many different sectors of industry rely on our expertise.

Our strengths:

We have the latest production processes in our own production systems with unrivalled depth of added value. Our range of services extends from system planning and consultancy via the realisation of turnkey plants to tailored service packages. Flexibility and extensive scalability of system solutions is our ongoing objective.

The benefit to you:

For all queries and tasks relating to intralogistics systems and applications, with us you have just one contact partner: the right one. We design, produce and implement made-to-measure solutions in and from our own company. Our proven expertise and our high quality standards assure our customers the highest possible levels of efficiency and security of investment in intralogistics projects.
