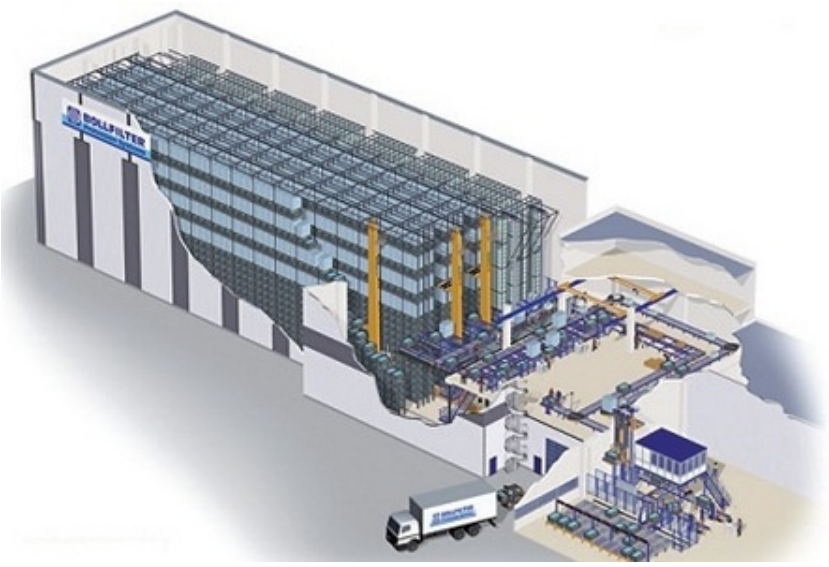
Boll & Kirch

Construction of a new central warehouse complex

BOLL & KIRCH Filterbau GmbH in Kerpen offers innovative and efficient solutions regarding liquid and gas filtration at 45 international locations.

They are an international company and a leading manufacturer of filters and recognise over 80 classification societies. They specialise in the filtration of liquids and gases. Their application-optimised automated, duplex and simplex filters are the result of in-house research & development and conform to internationally recognised technical standards.



Automated storage system and high-bay warehouse with joint conveyor system under one roof

BOLL & KIRCH Filterbau GmbH in Kerpen offers innovative and efficient solutions regarding liquid and gas filtration at 45 international locations. The world-wide increasing demand requires a new central warehouse a the production location constructed by the general contractor SSI SCHAEFER in Giebelstadt.

Special feature of the project: Underneath the roof of the 20 metre high high-bay warehouse is the pallet warehouse (three aisles) as well as the two aisles of the Miniload. The entire conveying system in the plant is designed for transporting pallets and pallet cages as well as trays for storing small parts. The "ant" warehouse management system from SSI SCHÄFER is used for the information technology connection and control of the operative processes.
