

Logistics software

We provide sustainable logistics processes and long-term efficiency

SSI SCHAEFER is one of the world's largest logistics solutions provider with over 700 employees in the software sector and more than 600 installed systems.

As a software manufacturer and system integrator, we are fully aware that software must be used as a means to an end, always with the aim of increasing the **efficiency** of our customers.

SSI SCHAEFER as a reliable partner relates not only to your objectives, but also to your business processes. Our many years of experience and our wide range of services provide you with made-to-measure and cost-effective solutions.

Logistics software by SSI SCHAEFER is able to control all the activities in your warehouse, regardless of whether these tasks are carried out by humans or machines. This means that we deliver a complete package that covers all areas in a warehouse.

- Warehouse Management System (WMS)
- Forklift control system
- Order picking system
- Material flow system for controlling automatic systems
- Special software modules to support automatic order picking
- PLC to control the individual mechanical elements

We will be your partner in finding and implementing a customised solution, providing a logistics process for your company that fully meets your long-term needs. The basis for this is our process expertise and knowledge of specialised sector requirements.

Software by SSI SCHAEFER is in use in a wide variety of sectors. Given below is a list of some of the sectors in which our customers operate.

- Retail
- Pharmaceuticals
- Logistics service providers
- Beverage industry
- Dairy industry
- Dispatch
