

## Increased Efficiency

You increase your success because we increase your efficiency.

Increasing efficiency is the requirement for sustainable economic success. Only those companies striving to ever improve further instead of resting on their laurels will prevail against the competition. You cannot meet today's challenges with yesterday's methods and expect to be in business tomorrow. Our customers know that.

In intralogistics, as well as in waste management and workstation systems, we are able to draw upon substantial experience. We are developing innovative products, components and solutions aiming to increase the efficiency of our customers.

Over 70 years experience in storage logistics.  
More than 35 years experience in waste management. 16 production facilities on 3 continents. Present in 50 countries worldwide.  
One aim: Efficiency-enhancing solutions for our customers

Increases in efficiency can materialise in many ways: speeding-up processes, reducing costs, lowering error rates, saving resources, allowing people to reach their full potential. Since many decades, these are our areas of expertise and we are looking back on a large number of successful projects.

Throughout all of our projects, we are focussing on the overall solution. With great vertical integration we are supplying complete systems, customised to our clients' requirements. Communication and compatibility of the components are of crucial importance here. That's how we enable our customers to beat their competition time and again.

When it comes to efficient solutions, we are not just sitting right at the source - we *are* the source. This includes in particular using the most modern materials and technologies. Our innovative ability already resulted in numerous industry awards and made us the market leader in intralogistics.

Ultimately, we can only be successful if our customers succeed as well. Increasing the
